1. Description

The 4D Systems 7.0" Display Bezel is a plastic bezel for the uLCD-70DT display module.

This bezel provides a sleek cover to the uLCD-70DT display module and also provides an easy method to panel-mount the display module into an enclosure. The bezel mounts the display module, while also providing a mounting solution into a panel, keeping it all securely together.

Spring clips attach to the bezel in four locations, and hold it tightly to the enclosure/wall panel, offering a range of panel thickness from 1mm to 2.5mm without the need to add washers. If a panel thicker than 2.5mm is required, washers can be placed under the spring clip, however, this is not recommended practice.

Note

This bezel is only designed for indoor use. It is not weather-tight, nor does it offer any IP rating. It should only be used indoors in clean environments as it offers little protection to the circuitry of moisture or particles.

Bezels are available in Black or White.

Bare 7.0" Bezel - Front

Bare 7.0" Bezel - Back

ORDERING INFORMATION

4DBEZEL-70-B (Black Version)
4DBEZEL-70-W (White Version)
Packaging: Module sealed in antistatic foam padded 4D Systems Box
